Assessment task:

Stripping out works

Persons at risk	Details	
Contractors	<<e.g. all operatives>>	<<e.g.
Visitors		
Gen. Public / Others	<<e.g. others in the area>>	

Hz No.	Hazard description	How are persons affected?	P
1	Cuts and abrasions	e.g. Operatives can suffer cuts to their fingers or hands from using cutting or breaking tools	<<e.g. 4>>
2	Fall from heights	e.g. Operatives can suffer serious injuries if they fall while accessing high areas especially if using ladders or hop ups	<<e.g. 4>>
3	Manual handling	e.g. Pulling walls or ceiling boards down, or pulling at cables etc can cause muscle strains	<<e.g. 4>>
4	Using power tools	e.g. Operatives may suffer serious cuts or burns from contact with blades	<<e.g. 4>>

Probability (P)	5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely
Severity (S)	5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible
Risk (R)	0-8=low risk, no action required. 9-15=medium risk, ensure ad

RA Ref No:

Assessment Date	Review Dates / Initials	
<<Date>>	<<Dates>>	<<Initials>>

any disabled?	Comments
Yes <input type="checkbox"/> No	<<e.g. manually unloading lorry containing 25kg bags of cement and placing in site store 10m away>>
Yes <input type="checkbox"/> No	
Yes <input type="checkbox"/> No	

Existing controls	Further controls / action
e.g. All operatives to wear gloves if practicable>>	<<e.g. All operatives to be given Toolbox Talks on general safety>>
e.g. Site supervisor to ensure that work height is planned and that ladders or ops are only used for short terms or ess>>	<<e.g. Site supervisor to ensure that suitable access /working platforms are available if appropriate>>
e.g.Operatives to use mechanical aids wherever possible>>	<<e.g. Operatives to attend Manual Handling course>>
e.g. Site supervisor to ensure that only lified personnel use power tools>>	<<e.g. Operatives to ensure that they are competent to use the equipment>>

-25=high risk, stop operation & implement control measures

5	Flying debris – eye damage	Eg Operatives will be injured if they are struck by flying debris or dust etc	<<e.g. >>
	Falling objects	Eg Anyone in the vicinity by can be injured if they are struck by falling materials	<<e.g. >>
	Electric shock	Eg Operative can suffer electric shock if they come into contact with live circuits	<<e.g. >>
	Asbestos	Eg Operatives and passers by can be exposed to asbestos	<<e.g. >>

Operatives to wear suitable eye protection at all times >>	<< Site supervisor to ensure that all protocols are followed>>
Operatives to take care as they handle walls etc >>	<< Site supervisor to ensure that working area is kept clear of non essential personnel>>
Site supervisor to check for live cables before stripping out begins. Live cables to be marked >>	<< Site supervisor to ensure that all protocols are followed>>
Supervisor to ensure that Asbestos register has been seen before any massive works start. >>	<< Site supervisor to ensure that all protocols are followed>>

Probability (P)	5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely
Severity (S)	5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible
Risk (R)	0-8=low risk, no action required. 9-15=medium risk, ensure adequate control measures

16-25=high risk, stop operation & implement control measures
